MyVolumio

MyVolumio is a set of additional features to get the best out of Volumio.

You will find a coupon code in the package, it can be either a "Coupon Code" or "Lifetime Device Code".

COUPON CODE

- First, create an Account by clicking to the settings menu, then Sign-In.
 - Once done, navigate to your profile and click on "Upgrade Plan"
 - Select the appropriate plan as per the coupon instruction and complete your free transaction
 - Return to the Profile page and make sure your device is enabled and with a play icon on the left
- Your device is now active and ready for MyVolumio. You can access it from myvolumio.org from anywhere.

DEVICE CODE

- While configuring through the First Configuration wizard, you'll see a step called "Device Code"
- Click the "Validate Device code" button.
- Once validated, your device will be upgraded to the lifetime Superstar Plan, with some exclusive premium features.
- If you wish to create a MyVolumio account afterwards (not required), your account will be automatically upgraded to the Superstar tier.
- In case you missed the configuration step, the wizard can be restarted by going into Settings -> System -> Run first Config Wizard

6

Enjoy

You're now ready to enjoy your Music with Volumio!

Don't forget to read the user manual: you will find many useful tips and tricks to enjoy Volumio at its full potential

If you need help, head to our community at volumio.org/forum. Our community is very active and helpful!

If you can't find the answers to your questions there, send us an email at support@volumio.org with your coupon code (if any) on the email subject

VOLUMIO[®] PRIMO QUICK START GUIDE

1

Preparation

- Plug the Ethernet Cable (not mandatory, but suggested)
- Connect your Audio system via USB, Analog Output or SPDIF
- Power the device on by plugging the power supply
- Leave the device alone for five minutes
- Do not remove power during this first initialization process

2

First Connection

- Volumio is meant to be used via another device like a Phone, Tablet or PC
- To configure it the first time, we will connect via the "Hotspot Mode"
- Volumio creates its own Wi-Fi Network called "Volumio"
- Connect to it with the password "volumio2"
- The user Interface will open automatically, if not navigate to 192.168.211.1
- Now we can move on and configure Volumio

3

First Configuration

- Select your language, if not already detected
- Give your device a unique name, like "Studio" or "Bedroom"
- Select your Audio Output (Analog Output, SPDIF, HDMI or USB)
- If you want to connect to your Wireless Network, select it and input the passphrase.
- Volumio will connect to your wireless network after the configuration is complete.
- If you have a Device Code coupon, see point 5
- We're now ready to connect to it.

4

Browser Control

Volumio is now connected to your network, either with wired or wireless connection

You can now access Volumio by typing the IP address of your device into any browser
To find out the best way to get the IP address given your OS and setup, see docs.volumio.org
For extra convenience, you can use the Android App, which will find your device automatically
Download the Android app from volumio.org/android-app and use the provided coupon code

There is also an iOs app which can be purchased separately
